

# Venom Leech and the Hands of Rain

Disarmonia Mundi

Flawless  
Your pure elitist cult looks so flawless now  
The conception of annihilation  
I'm a sinner without cause an aberration  
Unbound  
Blackness lays her wings on me  
The mirror lies but I stand still  
I hammer the nails inside  
The burning chaos of my mind

[Chorus:]  
Feel it flow  
Feel it blow  
Feel it rage inside your heart  
Feel it turn  
Feel it burn  
Nothing's left to tear apart  
Burn you  
See me burn  
You feel me burn  
Beneath the rays of a colder sun  
Burning ice and velvet rain  
(I know I have to die for)  
Falling from the liar's den  
(Get rid of all this sorrow)  
Begging for  
The hands of rain  
(You know you have to die for)  
A venom leech is what I am  
(Inside I feel so hollow)

Self-deceive your brain  
Crawling in the corner of your brain  
Impostor  
Guess what I am  
Guess is what I've always been  
So disgusted by this world yet I feel it crawling underneath  
You feed my wrath and heal my fury  
Turn me to the beast I despise

Rain of glass  
Nails of fear  
Winds of hatred  
Gather here  
Cold emotions  
Turn to dust  
All the shit you worship  
I distrust

I can't have enough of burning hatred  
Shape my wings in blood and anger  
I feel it flow  
And serves me right  
There's nothing left inside of me
