

## The Decline

### Disbelief

instead of restriction  
instead of well-known  
instead of the narrow minded  
diversity makes us grow, makes us grow...

instead of pretenders  
instead of this fake  
instead of al promises  
collapse will be our fate

why - why - why - why, please tell me why, tell me why...

instead of the cowards  
instead of the blind  
instead of excuses  
indifference destroys our kind

now, face the decline  
now, face the decline  
flashed before my eyes  
it's for good, now face the decline...

now, face the decline  
now, face the decline  
flashed before my eyes  
it's for good, now face the decline...

now...
