

# Save The Past

## Disillusion

So here we stand the day has come  
The hit was hard and long the run  
And as long as it might take me  
I want to come home to the place to go

Got a note that said it's overdue  
Had a thought but too much else to do  
And what's left now is all but quicksand  
And I want to come home to the place to go

In knew it'd come eventually  
The letter folded carefully  
And for all it's worth I missed you too  
And coming back home to the place to go

Here we go and save the past  
Up the sails we are off at last  
Here we go and save the past  
Starboards on we're off at last

Is it true that she went silently  
In the end that she went peacefully  
And for all it's worth I miss her too  
And coming back home

Here we go and save the past

Here we are the day has come  
The cypress grow with words of mourn  
What is left now is all but quicksand  
And I want to come home to the place to go

Here we go and save the past  
Up the sails we are off at last  
Here we go and save the past  
Starboards on we're off at last

So here we stand the day has come  
The hit was hard and long the run  
And as long it might take me  
I want to come home

Got a note that said it's overdue  
Had a thought but too much else to do  
And what's left now is all but quicksand  
And I want to come home to the place to go

Here we go and save the past  
Up the sails we are off at last  
Here we go and save the past  
Starboards on we're off

Here we go and save the past  
Haven't I saved it all at last?  
Here we go and save the past  
Haven't I saved it all at last?  
Here we go and save the past

Haven't I saved it all at last?  
Here we go and save the past  
Haven't I saved it all at last?
