

# Come To Me

Dispatch

Cast a spell on me, don't shake my constellation  
I'll be riding out all damn time  
Man, I got so lost, such a cost  
I let you down

See the love shining down on you  
Tell me things, all that we can do  
Come to me, come to me, for you need it  
Come to me, come to me, for you need it, for you need it

Underneath it all I cast in my chips to win.  
I thought I looked so steady,  
baby I was ready  
but I find I lost it

See the luck shining down on you  
Tell me things, all that we can do  
Come to me, come to me, for you need it  
Come to me, come to me, for you need it, for you need it

I'm always up in the clouds, I don't wanna come down!  
I'm always down in the clouds, I don't wanna come down  
I don't wanna come down, I don't wanna come down  
I don't wanna come down, I don't wanna come down  
I don't wanna come down, I don't wanna come down  
I don't wanna come down, I don't wanna come down  
I don't wanna come down, I don't wanna come down  
I don't wanna come down, I don't wanna come down
