Kind fall we've had enough
Don't really wanna hold much longer
Silver sun I feel your love
Very soon we will ride

So get ready boy because here I go
I've been waiting my whole life just to let it roll
And I bank to the right and away I fly

Back to the ground we came from hey back to the ground we fall

Caught the rain with your all alone The milkweed and the green below us It's early yet but wind is strong And there's a world on it's way

So get ready boy because here I go
I've been waiting my whole life just to let it roll
And I bank to the right and away I fly

Hey back to the ground we came from hey back to the ground we fall

Aim back to the ground we came from and back to the ground we fall

So get ready boy because here I go
I been waiting my whole life just to let it go
And I bank to the right and away I fly

Back to the ground we came from hey back to the ground we fall Back to the ground we came from aim back to the ground we fall
