## **Show Me Around**

I just got into this town But it already seems such a bore Not what you call a small town But I've seen a hundred like it before.

So don't try to take advantage I just want you to show me the sights My temperature's up, my energy's high Gonna cause an explosion tonight.

## chorus

Show me around, I'm looking for a lover Show me around, I've seen it all before Show me around, I'm searching for a brother Going over the top and I sure as hell ain't going alone

I'm not staying forever

Just long enough to see a little more I might be new to this place But I ain't new to the score

So don't try to take advantage Thought I ain't one for acting coy I'm gonna dress up I'm gonna show you tonight That I ain't no country

repeat chorus

So don't try to take advantage I just want you to show me the sights My temperature's up, my energy's high Gonna cause an explosion tonight Divine
