

For A Good Time

Divinyls

That cheap little thing u drive it's just cold machinery
I'll make you come alive u ought to be with me
For a good time
I said life goes by so fast so baby you might as well live
Cause nothin's gonna last I don't know nothing that I wouldn't
give
For a good time, for a good time, for a good time

You better check your priorities if I'm gonna be your girl
U gotta dress me with your degrees
Cause baby God made the world for a good time yeah

A woman and a man were made so perfectly
I am what I am baby put your faith in me
For a good time, for a good time, for a good time

I like to watch your mouth I'd like to take it south
The heart in my breast is beating me to death
This is a cruel town I'll make you feel like a king
And when you lose your crown all you gotta do is give me a ring
For a good time, for a good time, for a good time
