

Long Roads

Dixie Chicks

Where have I known you before?
Seems like lifetimes, maybe more
Our time together goes so fast
And so slowly when that time has past
I want to walk on the long roads with you, Love

These days it's all that I can think of I can't even sleep

I want to walk on the long roads with you
But we'll have to swim an ocean, climb a mountain first
And the love runs so deep, these nights

The mountains high, the valleys wide
I have a place where we can quench our thirst

Behind us the road is fading fast
Oh just sit back and enjoy the ride
While in front of us a light shines that says the fate's been cast
And the road we now must climb
Comes so easily one step at a time
