

Close to you

DJ Aligator

I can't sleep at night
Starin' at the phone
Knowin' you are not alone

She is right there by your side
Im trying just to hide
All the things I feel inside

I can sense the chemistry
When you're standin' close to me
I feel like a ship that's lost at sea

It's gettin' harder to ignore
It's not like anything before
I know it's crazy baby but I want more

I wish I could be close to you
And feel your every move
Never meant to feel this way
Maybe you would come around one day

I wish I could be close to you
And feel your every touch
Cause the sky won't heal the way i feel
Heaven knows I've wanted it so much
Wanted it so much
Wanted it so much

I've wisched that
I could be
so close to you

I'm the one to blame
Tryin'to explain
But I will cause myself such pain

Your heart is occupied
I'm tryin'to turn the time
But time was never on my side

I can sense the chemistry
When you're standin' close to me
I feel like a ship that's lost at sea

It's gettin' harder to ignore
It's not like anything before
I know it's crazy baby but I want more

I wish I could be close to you
And feel your every move
Never meant to feel this way
Maybe you would come around one day

I wish I could be close to you
To feel your every touch
Cause the sky won't heal the way i feel
Heaven knows I've wanted it so much

I wanna to feel your every touch
I wanna be so close to you
I want you to feel this way
Feel this way
Feel this way I do

Heyeyeyey
Heyeyeyey
Close to you
Close to you
