

# Black Rain

DJ Bobo

Should we stay or runaway  
That's the price we have to pay  
And then before we fade to grey, the message is love  
Tell me where the sky is blue  
There's a place for me and you  
Believe in what can guide us through, the message is love

Rainforrest can survive, rainforrest save our life  
If there's a wind of change, the message is love  
Protect the seven seas, protect the helpless trees  
We need the wind of change, the message is love

Black rain falling on me  
Black rain is all that I see  
Black rain colours the sand  
Too fast - I don't understand

Black rain made out of steam  
Black rain to the extreme  
Black rain - what can we do  
Too fast - a nightmare comes true

False prophets talking about, - our life our destiny  
Rainforest's still alive, - sounds like a joke an irony  
The air smells dirty- we can all see pollution  
To heal the world, - is not a game or an illusion  
We see the world hunger, not enough to eat  
We close our eyes, - walking through the lonely streets  
Strange disease, - there's nothing, there's no cure  
Cancer, aids - and much more we know for sure

Sometimes we get angry, there's no focus in our life  
When people get hungry, they gonna learn how to survive  
homeless people, - concealed in the street  
With no hopes and no dreams, with no shoes for their feet  
How many guns - they have to melt they have to burn  
Return to good sense, when will we ever learn  
Fighting this freedom, - for everyone, for you and me  
I know that this world, - is the place, for us to be

They've got drugs for children, sniff to be free  
They've got so much corruption, this is all what I can see  
Respect yourself - you don't need that pack of crack  
You only live once and you're not coming back  
Spread your arms - against the wall you're not to small  
That's all, to call, - who's next in the line to fall  
This world is in motion, - runs faster and faster  
We pray for a wind of change, don't want that disaster
