

# Change the World

DJ Bobo

You've got the changed  
and i've got the changed  
and we've got the changed  
You can changed the world  
Let's dance  
Come on  
Let's changed the world  
we know what's going on

You can call me a dreamer, I guess I'm a believer  
I believe we can change the world one day  
Anyway, sooner or later, we're natures creator  
We wanna live in peace, stop to run away  
Open your mind, the view doesn't get clearer  
This is your time, don't let nobody stop ya  
Here is your destiny, holding your hand  
Let's call it a friend

Everybody stand up, up  
We can make things better, better  
Everybody for peace, peace  
Come on let's change the world

Let's change the world - together we are strong  
Let's change the world - we know what's going on  
Let's change it all - the world is in our hands  
We all need peace, we all need hope  
Let us change the world

Stop, step back don't let somebody play the game  
Scream it loud, we don't want no black rain  
No pain anymore in human history  
I'm talking about a world, full of melody  
My life keeps on running, - just faster and faster  
I pray for a wind of change, don't want that disaster  
Fighting with spirit, - for everyone, for you and me  
This world is my place to be

Everybody stand up, up  
We can make things better, better  
Everybody for peace, peace  
Come on let's change the world

Together we'll change the world  
This is our destiny  
And make it a better place  
In peace and harmony  
Together we'll change the world  
Can be reality  
And then we gonna, make it right  
And stop the misery

All the people in every nation  
Now we gonna rise above  
All the problems and frustration  
Now stand up and say enough
