

One Night in Heaven

DJ Bobo

One night in heaven
Uh, where we have started from
I know our time has come
One night in heaven
Uh, I need you more and more
You are the one I have been waiting for

One night in heaven, one night in heaven
I wanna be - one night with you
I wanna be - one night
One night in heaven with you

There is something words can not express
Passion is what I feel for you
I can't stay alive without your love
My heart is beating just for two
Every night with you is like a dream
Announcing an amazing day
And since I met you I feel so free
Let's escape and fly away

No one else can just compare with you
You're the only one for me
And my heart is full of things to say
We were always meant to be
Let me know what you're believing in
What you really feel inside
Can you tell the same when I'm with you
You can light my darkest night

There is something words can not express
The way I feel for you
One night in heaven
I know our time has come
One night in heaven
You are the one I have been waiting for
