

# This World Is Magic

DJ Bobo

Dreams can make you fly  
This world is magic  
Rainbows in the sky  
This world is magic to me  
Dreams can make you fly  
This world is magic  
We need peace on earth  
The second birth of paradise

This world is magic  
This world is magic to me  
This world is magic

What is the magic of this world  
What is the magic of this world  
What is the magic of this world  
What is the magic of this world  
What is the magic of this world  
What is the magic of this world  
We need peace on earth  
The second birth of paradise

This world is what we share  
The nature and the air  
Life could be paradise  
Eternal peace is what we need  
To live in harmony  
For human history  
Pray for a better world  
When you close your eyes again

Planet earth, that's the name of my place  
I'm born in this world, in the entire space  
Planet earth, is my home, is my face  
Follow your trace embrace this human race  
In case, there's a new decade in human history  
I'm talking about respect this is my destiny  
Feel free, and stop running away  
From the doubt in your mind,- never fade to grey

Planet earth, gentle and blue  
Then cold as a rock, or ice without a hue  
Planet earth, made out of dust  
A big ball of metal, condemn to rust  
Pray, let your soul be free  
Find out how to heal a bleeding wound don't stand around  
Life could be paradise, peace on earth is what I found  
All around in a magic world from the air to the ground
