

Heal it

Dog Is Dead

Come and meet me by the hotel
yeah you've always lived a terrible life
And through the blisters and the heart swings
yeah you've always done whatever you like

It's a messy situation
You don't have to feel like you're on the inside
And with a little conversation,
What's it take for us to talk for a while?

It just takes a little time
When your body breaks on the inside
And we can heal it, and we can heal it

If it can break then we can heal it
(If it can break then we can heal it)
If it can break then we can heal it

Come and see me like you always did
Come and see me when you're dunking in time
And it's a feeling that I know too well
Take a beating then get back in the fight

And marry-merry round where the sun don't shine
it only makes you sad when it's burning your eyes
And I won't be leaving home to be a deer in the headlights
And I won't be leaving here when I'm sick in my mind

It just takes a little time
When your body breaks on the inside
And we can heal it, and we can heal it

(if it can break then we can heal it)
If it can break then we can heal it
(If it can break then we can heal it)
If it can break then we can heal it

If you don't feel right, never fear, never hide
Take another chance, start another fire
And we felt so small with your back to the wall
Take another chance, make another one
If you fight and you die and you don't know why
Take another one, take another one
Lift your hands to the light it's a perfect night
Give another chance, start another fire

If it can break then we can heal it
If it can break then we can heal it
If it can break then we can heal it
If it can break then we can heal it
