

Prozac Nation

Dokken

Safer today to go outside to your window
Go down the stairs
You remember the way
New combination you found in a letter
Ready to fly and escape
You're on the meds and bad tranquilizers
Keeping you down is it your fun
Taking a walk in the park with the children
All that you want is a smile

Everybody's getting high today
Go on and alter your mind
Fade away...

All that you want is some peace in the sunshine
Far from the freaks who are on
Staring at TV alone with no sunsets
Time for your oranges and blues
You're off the meds and the bad tranquilizers
Keeping you down is it your kind of fun
Taking a walk in the park with the children
All that you want is a smile

Everybody's getting high today
Go on and alter your mind
Fade away...

Let it go let it go
There's no reason to stay
Let it go let it go
Before they take you away

So when they lock you again
In a white room
Antiseptic your fate
You don't belong in a place
Where they talk to themselves
It's just hell

All you want is a smile
