## **Down from Dover**

## **Dolly Parton**

I know this dress I'm wearing doesn't hide the secret I have tr ied concealing When he left he promised me that he'd be back by the time it wa s revealing The sun behind a cloud just casts the crawling shadow o'er the fields of clover And time is running out for me I wish that he would hurry down from Dover He's been gone so long when he left the snow was deep upon the ground And I have seen a spring and summer pass and now the leaves are turning brown And any time a tiny face will show itself 'cause waiting's almo st over But I won't have a name to give it if he doesn't hurry down fro m Dover My folks weren't understanding when they found out they sent me from the home place My daddy said if folks found out he'd be ashamed to ever show h is face My mamma said I was a fool and she did not believe it when I to ld her That everything would be all right 'cause soon he would be comi ng down from Dover I loved him more than anything and I could not refuse him when he needed me He was the only one I'd loved and I just can't believe that he was using me He couldn't leave me here like this I know it can't be so it ca n't be over He wouldn't make me go through this so long, oh he'll be coming down from Dover My body aches the time is here it's lonely in this place where I'm lyin' Our baby has been born but something's wrong it's much too stil l I hear no cryin' I guess in some strange way she knew she'd never have a father' s arms to hold her And dying was her way of telling me he wasn't coming down from Dover
