

## Fuel to the Flame

Dolly Parton

You kindle the fire of love inside me  
Each time our lips meet  
I'm not strong when we're alone  
Your kisses make me weak  
You must know how I feel  
But do you feel the same  
Everytime you kiss me  
You add fuel to the flame  
My eyes light up when I see you  
I burn with desire  
Each time you're near  
You say you'll care  
But still I'm not sure  
But please don't ask me to love you  
If you're not gonna change my name

Everytime you touch me  
You add fuel to the flame  
This fire you started inside me  
Has reached my very soul  
You're adding fuel to a flame  
That's already burning out of control  
When you give me your name  
I give you everything  
Everytime you kiss me  
Adds fuel to the flame  
Yes everytime you touch me  
You add fuel to the flame
