

One Perfect Moment

Domain

All of my life I know that your heart's true
All of my dreams I wanna share with you
And when we touch I know we're meant to
Our love will be forever true

And in the night your face is all I see
Wherever you are babe is where I
Will always and forever be

All I fear - all I own
When you're near - the only one
And I will care for you - touching you my love
I'll be true babe - if you never stop the (precious) things you do

One perfect moment - one moment with you
All - all that I ever wanted from you
One - one perfect moment - one moment with you
All - all that I ever needed from you

No one can break - no one can tear apart
Forever we will keep our hungry hearts
You're the sun - you're every shiny sparkle of a million stars

All I fear - all I own
When you're near - the only one
And I will care for you - touching you my love
I'll be true babe - if you never stop the (precious) things you do

One perfect moment - one moment with you
All - all that I ever wanted from you
One - one perfect moment - one moment with you
All - all that I ever needed from you

Hold me forever - don't let me never
Make it alone without you

You're the answer - you're every prayer
Heart over matter for you

Hold me forever - don't let me never
Make it alone without you

You're the answer - you're every prayer
Heart over matter - heart over matter for you

The only one
And I will care for you - touching you my love
I'll be true babe - if you never stop the (precious) things you do

One perfect moment - one moment with you
All - all that I ever wanted from you
One - one perfect moment - one moment with you
All - all that I ever needed from you
