

In the night like a star explosion
Light a fire for the world to see

In the night on the wings of heaven
You can be what you want to be

Touch the sky
Make it real
No one around will ever catch you

Scream out loud
Just break free
Just one voice can move a mountain

Light the sky
Way up high
Light the sky
You can fly

Count the stars - you can shake the heavens
Feel the fire out there burning for you

Count the stars on your roundtrip journey
From the center of the earth to the deepest blue

Touch the sky
Make it real
No one around will ever catch you

Scream out loud
Just break free
Just one voice can move a mountain

Light the sky
Way up high
Light the sky
You can fly

And in your dreams she's waitin'
And in your dreams she's dreaming of you
What are you waiting for
Go for what lies right before you

(Always waiting)
(Always there)
(No hesitating)
(Don't you dare)
