

God Is Here

Don Moen

God is here
Dwelling in the praise of His people
God is near
Healing broken hearts with His touch
As we gather to worship His name
He is riding on the wings of our praise
I believe I believe that God is here

Are you weary heavy laden
Come and He will give you rest
It is written
It's a promise
That is what our Savior said
And He's promised
To be right here with us
As we come together in His name

Wounded soldier from the battle
Feeling like you're losing ground
Just surrender to His Spirit
The victory will be safe and sound
If you're hungry come and feast at His table
If you're thirsty come and you will be filled

As we gather to worship His name
He is riding on the wings of our praise
I believe I believe that God is here
I believe I believe that God is here
I believe I believe that God is here
