## The Only Game In Town

## **Don Williams**

The only game in town, the only one I've found When you're lookin' at love real close You're lookin' at me I'm looking at you The only one I know, that never lets me down So good to be around, the only game in town

I've been around, had my time
I've been crazy, been out of my mind
Than you came along, changed my ways
You made me stop playin' those games everybody plays

The only game in town, the only one I've found When you're lookin' at love real close You're lookin' at me I'm looking at you The only one I know, that never lets me down So good to be around, the only game in town

Then you came along and changed my ways
You made me stop playin' those games everybody plays

The only game in town, the only one I've found When you're lookin' at love real close You're lookin' at me I'm looking at you The only one I know, that never lets me down So good to be around, the only game in town

Well you're the only game in town
