## **Swing On Down**

## **Donavon Frankenreiter**

(Swing on down, swing on down to me) (Swing on down, swing on down to me)

In the morning when the suns still shy And the last star lingers and the pale blue sky That's when I know you're around I said that's when I know you're around

And in the evening when the light come to the tree's And the birds sing a song as if they're singing to me That's when I know you're around I said that's when I know you're around

I'm dreaming if you could Swing on down, swing on down to me I want to know if you would Swing on down, swing on down to me Every time I see something like that I want you to (swing on down to me) Baby won't you just (swing on down) Swing on down to me

Every time the rain comes out but the sun still wants to shout That's when I know you're around I said that's when I know you're around And you know all the colours they just speak to me Tell me stories of how it used to be When you were still around, I wish you were still around

Because I want you to Swing on down, swing on down to me From the clouds won't you just (Swing on down), swing on down to me Baby won't you just (Swing on down), swing on down to me I want to see you today I want you to swing on down to me It's going to feel so good

All the colours they tell me things And the birds in the trees And the stars in the sky
