

# Come Back

Donell Jones

I remember when we used to love  
It seems like yesterday  
You know that I understand  
But I wish that you could stay  
But you live far away, seem so far away  
Now I can't wait until the summertime  
I know, you'll be coming back real soon  
Baby, you know how much I'm missin' you  
Said, I'm missin' you, I'm missin' you  
I been thinking about you lady  
Things ain't been the same since you've been gone  
I can't live without you lady  
So won't you come back, come back?  
No matter how long it takes, I'll wait for you  
As I watch the seasons pass me by  
God only knows that there's no mountains I won't climb  
'Cuz you stay in my heart and always on my mind  
Life without you is just an empty world, yeah  
What once was clear is now a blur  
And this is something that I can't ignore  
I'm missing you, I'm missing you  
I been thinking about you lady  
Things ain't been the same since you've been gone  
I can't live without you lady  
So won't you come back, come back?  
Said, I been waiting  
Love I just can't live without  
Oh yeah  
Instead I've been  
I been thinking about you lady  
Things ain't been the same since you've been gone  
I can't live without you lady  
So won't you come back, come back?  
I been thinking about you lady  
Things ain't been the same since you've been gone  
I can't live without you lady  
So won't you come back, come back?  
I been thinking about you lady  
Things ain't been the same since you've been gone  
I can't live without you lady  
So won't you come back, come back?  
Come back baby
