

# We Can Be Friends

Donkeyboy

This, this could be called a disaster  
If this is what you are after  
You don't know where to go  
This, was nothing that I meant to do  
But still I wanna blame it on you  
Bone appétit cuz I told you so

We can be friends, just for a day  
The dark of the sun is fading away (fading away)  
Even the stars will beg to stay  
A million miles away  
It takes me right up  
The reasons I found  
They're making me stop (making me stop)  
Give me the time to make the change  
A million miles away

Slippin' and then today  
You said that I'm out of my mind  
I wait for it cuz it hurts  
So, nothing's gonna stop me now  
Cuz I ain't gonna tell you how  
Bone appétit cuz I told you so

We can be friends, just for a day  
The dark of the sun is fading away (fading away)  
Even the stars will beg to stay  
A million miles away  
It takes me right up  
The reasons I found  
They're making me stop (making me stop)  
Give me the time to make the change  
3x A million miles away

We can be friends, just for a day  
The dark of the sun is fading away (fading away)  
Even the stars will beg to stay  
A million miles away  
It takes me right up  
The reasons I found  
They're making me stop (making me stop)  
Give me the time to make the change  
A million miles away

We can be friends, just for a day  
The dark of the sun is fading away (fading away)  
Even the stars will beg to stay  
A million miles away
