

Song I Can Sing

Donna Fargo

I take out my guitar and strum all my dreams
It's somewhere around here I know
Don't let me chase rainbows that don't would have an end
There must be a song I can sing
Where is the melody and where are the words where is the rhythm
of the drum
And where are the voices that can make my heart bring
I know there's a song I can sing

And if I keep trying find a secret to wake me from my dream
That sleeps on the footsteps of my soul
Some day I'll hear the music that can bring my voice swings
Cause I know there's a song I can sing
Yes some day I'll hear the melody and I'll find the words
And I'll feel the rhythm of the drum
And I'll listen to the voices that can make my heart bring
Yes somewhere there's a song I can sing
Yes some day I'll hear the melody...
