

Back Where You Belong

Donna Summer

Ooh I've been down there a million times
If I've been down before
Never thought I'd hurt so bad
To see you play the fool
Never mountain high enough
I said and I watched you climb
Till the day I saw you walk out of your life and mine

So I'm gonna leave you just because I want you
Back where you belong
Gonna make you see just what you've doing to me
Back where you belong
Be home right by my side is where you want to be
Back where you belong

Standing in the shadows
Watch your never-ending flight
Just how high as high to be before you see the light
Will this be the change you need to show you who you are
I love you but I'll leave you just to prove you've gone too far

Soon I'm gonna leave you just because I want you
Back where you belong
Gonna make you see just what you've doing to me
Back where you belong
Be home right by my side is where you want to be
Back where you belong

Can't you see you're losing me using me
Back where you belong
Heaven knows I love you will this make you see
Back where you belong

So I'm gonna leave you just because I want you
Back where you belong
Gonna make you see just what you've doing to me
Back where you belong
Be home right by my side is where you want to be
Back where you belong

Don't you understand my feelings and
Set me free
Don't you realize it...
