

Science of Love

Donna Summer

Chemistry look what you've done to me
Chemistry brought me near gravity
Chemistry look what you've done to me

You've called me up
My heart is pounding
Can't bear to breath
I've Just got over you

What do you want
You like a broken record
Spinnin' in my head
Why can't you let me be?

I don't understand
What it is about you
The more you reject me
The more I want from you

You're always on my mind
Always have been, always will be
I think about you all the time
I don't want to, you're a habit

And I'm running and running and
Running and running away from you
Every time when you call,
I come undone can't escape from you

Is it the science of Love?
Is it the science of Love?
It's the science of Love
It's the science of Love

I'm thinking to fight it
To get away from you
Something always pulled me
Right back to you

I don't understand
What it is about you
The more you reject me
The more I want from you

You're always on my mind
Always have been, always will be
I think about you all the time
I don't want to, you're a habit

And I'm running and running
And running and running away from you
Every time when you call,
I come undone can't escape from you

Is it the science of Love?
Is it the science of Love?
I wanna be with you but I'm so afraid

My heart's not ready cause I'm still in pain
I'm feeling my love is out of control
I wanna give up but I can't let go

You're always on my mind
Always have been, always will be
I think about you all the time
I don't want to, you're a habit

And I'm running and running and running and running away from you
Every time when you call, I come undone can't escape from you
Is it the science of Love?
Is it the science of Love?
It's the science of Love
It's the science of Love
Love is Science....
