To Turn the Stone

Donna Summer

The moon retreats behind a silver cloud As darkness throws its cloak towards the earth And mystery replaces what thought we knew

To turn the stone, to turn the stone

The one dimension only shows one side But do we see the same through different eyes As you and I peer into life's kaleidoscope

To turn the stone, to turn the stone

Eternal sands of time shift endlessly Behind a veil of motionless disguise An eyelid flash is all it really seems to need

To turn the stone, to turn the stone To turn the stone, to turn the stone
