

# Winter Melody

Donna Summer

Emptiness and just a memory  
Love is gone with nothing left for me  
All those wasted feelings for something I no longer have  
I never knew that love could hurt so bad

Winter melody, winter melody, winter melody  
Play for me, just for me  
'cause he's not coming home and I'm here alone  
On my own

I can't bear to see the sun go down  
Casting stormy shadows all around  
Nothing seems to matter, I just get by from day to day  
I never thought that you would leave this way

Winter melody, winter melody, winter melody  
Play for me, just for me  
'cause he's not coming home and I'm here alone  
On my own

Winter melody  
Play for me, just for me  
'cause he's not coming home and I'm here alone  
On my own

Loneliness, that's all that's left for me  
Happiness is chilled by winter's breeze  
I keep on remembering the day that you came along  
And since you left, well I just sing the song

Winter melody, winter melody, winter melody  
Play for me, just for me  
'cause he's not coming home and I'm here alone  
On my own
