Work That Magic

Donna Summer

Only you...

And the man and woman fall in love And it's magic...pure magic! (work that magic) All alone On a night like this With nothing to do But think about you

Under the moon Two lovers kiss And all I can do Is think about you

I fall in love with you Day after day after day Baby in New York heartbeat A herd of wild horses Could not keep me away And that's no promise That's a guarantee

Without your My heart is frantic Distant love can become tragic When we touch It's so romantic Only you can work that magic Only you...can work that magic (3x)

In my heart I hold your hand I'm gonna be true So true to you baby

And I've decided To make a love stand Next to you, right next to you baby I fall in love with you

Without your My heart is frantic Distant love can become tragic When we touch It's so romantic Only you can work that magic Only you...can work that magic

When the night Comes closing in Be there for me, be there baby

We'll sail away To a magic land Stay forever...stay forever Tenderly you call my name Turned my heart into a burning flame

Without your My heart is frantic Distant love can become tragic When we touch It's so romantic Only you can work that magic Only you...can work that magic

Without you My heart is frantic When we touch It's so romantic So romantic C'mon now...work it Work that magic (4x)
