

## Caribbean Medley

Donnie McClurkin

Two people together  
It was just a dream  
Until you came along  
My heart was waiting just for you

Tomorrow, forever  
We both heard these promises for far too long  
But now you make the words come true

So touch me now

I need to have you close tonite  
And show me how  
You can make me feel this way

You and me we have the right combination  
(Ohh we're all we need)  
Ohh it's just you and me  
We make the right combination  
Straight from the heart  
Love is the key

Can't keep it a secret  
Everything thing I feel is written on my face  
I can't hide my heart from you

You hold me, it's magic  
In your arms the world becomes a better place  
No one knows what love can do

Here we go  
Exactly where the road will lead us  
I don't know  
I just know that you'll be there

And whenever you call, I'm there  
Every stumble and fall, I share  
I'll be yours till we're old,  
I care, about you baby  
It's so easy to see, so strong  
Now I know you and me belong  
I'll be by your side forever

Ohhh ohhh...
