

Good-Bye Routine

Donots

This heart is barely beating The air is getting thin Do
you know what i mean? A change is due - for something new
This portrait of a fracture This x-ray of a big mistake,
that's me and you And you know it, too
Good-bye routine It's time to leave
I guess i miss a stranger A friend i've never had Someone
i've never met It's odd but true - well, how about you?
Throw out the road maps Let's go home to a place we've
never been before There's gotta be much, much, much more
Good-bye routine Pack your bags, let's leave Good-bye
routine Burn the props, rewrite the scene
(Whoo-hooo, yeah) Just can't fight the feeling We're
choking on the air that we're breathing And my mind is
reeling Forget about the mess that we're leaving Good-bye
routine Change the lives we're leading Kiss me now, we'll
call it even...
