

## 21st Century Slave

Dope Stars Inc.

In an age of industrial abuse  
Where production is so fast  
Where it's better to lose  
No more space for your personal view  
They will give what you need  
They will tell what is good  
They just tell you: "Eat this shit"  
And the big amount of flocks  
Just don't care about this  
They just tell you: "Work eat die thanks a lot"  
And then people become  
Just a slave of the spots

21st century slave don't forget to obey  
You live and pray. You drink and wait  
But now watch your life is freezing  
'Cause you work to dig up your grave  
You think it's fair believe and wait  
But hey watch your life of misery now  
It's time to get in your grave

Can't you see how they get rid of you  
And you think that is fair  
And you think that is good  
Then you should try to make up your mood  
'Cause the options you have  
Are created by those  
That will tell you: "Eat this shit"  
And your freedom to decide  
It's a joke it's a trick  
'Cause you want it: cool, clean, shaken and done  
And again you become  
Just a slave of the spots
