

Intervention

Dope

You'd lik to take control of me
I'm not how you'd have hoped I'd be
For what you're reaching out to me
I've got to break this scene goodbye

Yeah man I'm doin fine
I fucked my chick and did a line
Why do you still waste my time
Who gives a fuck just what you think

Somebody showed me there's a little thing to take me there
My mother warned me about this little thing, but I dont care

Mind your life, I'll do the same
Go back from where in which you came
You want to try to push your weight
Expect a fist right in the face
All your lies and social crimes
And circumstances you deny
Give your piss a special prize
And see them try to blow me away

Somebody shomes me there's a little thing to take me there
My mother warned me about this little thing, but I dont care
