

# How Do I Get Off The Moon

Doug Stone

We took off like a rocket ship to a place that we'd never been  
You took me higher and higher and higher  
I never thought it would end  
Then I woke up to find you'd left me behind  
Now what am I supposed to do  
Tell me how do I get off the moon

Tell me how do I get these stars from my eyes  
And how do I get on with my life  
How do I hold someone new when I can't let go of you  
Tell me how do I get off the moon

I never planned on leaving  
Guess you never planned to stay  
And after we'd come so far together  
How you'd just walk away and leave me up here  
In this cold atmosphere lost without a clue  
Tell me how do I get off the moon

You made it look so easy girl  
Now the least that you can do  
Is to tell me how do I get off the moon  
Tell me how do I get off the moon
