

## Here It Comes

Doves

This is a call a call to all  
It goes out to those who've been there  
And I should know because I've been  
Maybe once a week on Mondays

You should have seen what I've seen  
She doubles up and comes back Sundays  
And she will come into your heart  
It goes on and on and on

Here it comes  
Here comes my days in the sun  
Here it comes  
Here comes my time in the sun

This is the day, this is the time  
To stare at the skies in wonder  
We live a lie, you'll never find  
Never in a month of Sundays

You should have seen what I've seen  
He doubles up and comes back Mondays  
And he will come into your heart  
It goes on and on and on

Here it comes  
Here comes my days in the sun  
Here it comes  
Here comes my time in the sun  
And you don't know how it feels  
Here it comes  
Here comes my time in the sun

Here it comes  
Here comes my days in the sun  
Here it comes  
Here comes my time in the sun  
And you don't know how it feels  
Here it comes  
Here comes my time in the sun
