Jetstream

Tall machines wait in line So still lost in time Jets turn and make no sound Returning to the solid ground People drift out of time Watching numbers turn Seems that I've been waiting here forever

Jetstream, stormy seas Cast adrift on a troubled dream I've seen the sleeping ships at night I will meet you there The roar of the engine in the air (Jetstream)

Leave the things you don't need And the ones that you don't love Faith and hope keeps our minds together Your heart's left the ground tonight Scattered lost in light Seems that I've been waiting here forever

Jetstream, carbon seas Cast adrift on a troubled dream I've seen the silent jets at night I will meet you there The roar of the engine high in the air (Jetstream)

Sleeping ships in the night Shining steel lost in time Jets turn make no sound Returning to the safer ground People running outta time Lost in love last in line Seems I've waited here forever

Jetstream, stormy seas Cast adrift on a troubled dream I see the silent jets at night I will take you there The roar of the engine pollutes the air

Jetstream, jetstream, jetstream
