

Our own way

Down By Law

Seeing good and badness all around
When I look around this place
Sometimes I just want to get away
Then I close my eyes
Til I see her face
Then I can see
The whole world in front of me
And as I drive through sunshine
Radio playing, now the world's o.k.
I hold her hand, it's all I want
It's all I need
I feel alright inside today
Now I can see
The whole world in front of me
And if I'm awake at nighttime
Singing to myself then it's o.k.
I look over
I can see her face
Then I know we finally found the way
Thank you
