

Everybody's angels

Down with Webster

White dress black tie this place about to blow and your the dynamite
Your friends know all of them come around everybody needs a guardian

I'm through feeling lost cause I found you
The people around you surround you
(Just like the halo on your head)

[Chorus:]

Your everybody's angel, everybody's angel, everybody's angel in disguise
Your everybody's angel, everybody's angel, everybody's angel in disguise
You can make a dark room turn to light, you can build this whole place back to life
Your everybody's angel, everybody's angel, everybody's angel

Black dress fits right it's your world you'd be having it all nice
Me too that's what I like your silhouette the cigarette and I'm the light

I'm through feeling lost cause I found you
The people around you surround you
(Just like the halo on your head)

[Chorus]

[Cam's Rap]

Your not just another piece in a puzzle
Cause another wheel in the spoke
This world revolves around you baby
They can't say that it don't
So let's get lost in the moment just tearing you down were the in crowd,
Crowd in find us in the crowd and I know that
(The people around you surround you)
But let's keep it real you keep unreal, unbelievable, unachievable
(I'm through feeling lost cause I found you)
And I'm not the only one but you owe me one

[Chorus]

But when will you be my...

(When will you be my... angel in disguise)
