

# Kill Me

Downstait

Pain is the quickest way for a lesson to be learned  
You don't know the fire's hot until the time that you get burned  
What'd you say? What? You better check yourself, you think I don't know what you did?  
You think I won't go and crack your skull, man I think you're better off dead

There's nothing you can say to make me change my mind  
You better listen to me close, I'm gonna tell you for the last time

Kill me before I get the chance to kill you  
There's no place for you to run  
Kill me before I get the chance to kill you  
I won't stop until I'm done

Now you will live in fear of me every day  
Think you can run your mouth and there's not price that you will pay  
You better run, you better try to hide, if I was you, I'd write a will  
Call your family, say goodbye to them because your end is here

There's nothing you can say to make me change my mind  
You better listen to me close, I'm gonna tell you for the last time

Kill me before I get the chance to kill you  
There's no place for you to run  
Kill me before I get the chance to kill you  
I won't stop until I'm done

Fuck you, you piece of shit  
I'll snap your neck, little bitch  
Get back up you fucking punk  
I'll stomp your skull until I feel it crush

There's nothing you can say to make me change my mind  
You better listen to me close, I'm gonna tell you for the last time  
Tell you for the last time

Kill me before I get the chance to kill you  
There's no place for you to run  
Kill me before I get the chance to kill you  
I won't stop until I'm done
