Love Hound

Dr. Feelgood

You treat a man like a dog and that's just what you get You may try to leave him but he'll follow you yet Can't do a thing to get him off a your trail You better give up, he's hot on your tail

You used to laugh at me when i said i'll come back You let me roll over, you let me play dead You think your little lap dog is dragging you down I'm a oooh love hound

You went downtown and i followed you there A sniff of perfume still hung in the air You took the taxi, i took my time Rolled down the window and you hid me outside

You used to laugh at me when i said i'll come back You let me roll over, you let me play dead You think your little lap dog is dragging you down I'm a oooh love hound

No earthly reason to live in my home Just pure motor reflex is keeping me going Don't bother explaining it'll bring me down child All i can hear is the call of the wild

You can tease your little puppy mama, that's alright But when they grow up they just love to fight You tremble in the dark when you hear that sound I'm a oooh love hound

A love hound howls under the moon A love hound gonna come and love you soon Love you baby till the morning light Feel that little old love hound bite Open up your window mama, what's that sound I'm a oooh love hound
