

Fire In The Night

Dr. Hook

Fiery Lady, silk ecstasy
Dark skinned lassie, won't you lay me down
Be my soul , feel my
How you took me woman turned me round

She's a fire in the night
Blind you when the lights go down
She's a fire in the night
Yes the other women let me down

Hold me tightly, take it lightly
Don't try to fight me 'til you got me down
Cold and lonely, one night only
But it ain't lonely when the lights go down

She's a fire in the night
Blind you when the lights go down
She's a fire in the night
Yes the other women let me down

Acting crazy, feeling lazy
Her eyes are hazy and her hair is down
Got the feeling, what you're feeling
Surely healing me I'm coming round

She's a fire in the night
Blind you when the lights go down
She's a fire in the night
Yes the other women let me down

She's a fire in the night
Blind you when the lights go down
She's a fire in the night
Yes the other women let me down
