The Singularity

Dr. Steel

```
Zeroes and ones
The curve's begun
Nanotechnology transcending biology
This is how the race is won
By my hands the sons of man
Understand, execute the plan

Reverse engineering the human mind
Only a matter of time
That this fractal design
Emerges electronic life with
Prophetic symbology and
Modern technology

Bring on the Singularity
Transcend
Transcend biology
Bring on the Singularity
Transcend
Transcend biology

Immerse me in
Virtual reality and
The order of the galaxy
The possibilities expand
Demand more than the
Factory software
I don't care
I want to be smarter
And stronger and live longer

Speed up the accelerating returns
Cause carbon doesn't work
I want to evolve and operate at terahertz
So bring on the knee of the curve
And let's transcend biology
Our archaic humanity

Bring on the Singularity

Bring on the Singularity
Bring on the Singularity
Transcend
Transcend biology
Bring on the Singularity
Transcend
Transcend biology
Bring on the Singularity
Transcend
Transcend biology
Bring on the Singularity
Transcend
Transcend biology

And will I evolve to rise or fall
Becoming non-biological
And will I evolve to rise or fall
```

Becoming non-biological

Transcend biology
Bring on the Singularity

Transcend
Transcend biology

Becoming non-biological
Becoming non-biological
Will I evolve to rise or fall
Becoming non-biological
Bring on the Singularity

Zeroes and ones
Zeroes and ones

Becoming non-biological

Transcend biology
Bring on the Singularity

Transcend
