

Detonate

Dragonette

Another level into another obstacle course
We fall another ten feet through another trap door
And I don't wanna find a safe way home
I'm right where I want
And I believe we belong somewhere in between lost and found
And I, I don't think it can be wrong flying too close to the sun

I swear this love is so precarious
If you're a spark then I want to take it for pain
And even in the tiniest dust we'll light on
We'll light on, we'll light on in flames and detonate..

We detonate
We light up and detonate
Detonate

Living in our own natural disaster
Not really what we want, but kinda what we've asked for
We don't need to find a place to hide
'Cause we've come alive
And I believe we belong somewhere in between right and wrong
And I, I don't think that [?] flying too close to the sun

I swear this love is feeling dangerous
If you're a spark then I want to take it for pain
And even in the tiniest dust we'll light on
We'll light on, we'll light on in flames and detonate

We detonate
We light up and detonate
Detonate

If this is our, our time to go
Is there a better way to explore
Fill up the sky with ashes and dust
And when it settles down, we will never ask for more

I swear this love is so precarious
If you're a spark then I want to take it for pain
And even in the tiniest dust we'll light on
Oh, well this love is feeling dangerous
You are a spark and I want to take it for pain
And even in the tiniest dust we'll light on
We'll light on, we'll light on in flames and detonate

We detonate
We light up and detonate
Detonate
