## **Black Winter Night**

## **DragonForce**

Day after day as I bodies slay And the sun becomes dark in the sky Everything's lost for this human race And the dawn of a new age will rise

Rays of sunlight now are gone Only visions of ice will remain The fallen ones and forgotten souls Will rise up over the slain

No more hope as we raise our hands to the sky  ${\tt No}$  more dreams as the rivers run dry

Everything's lost all is left astray Only sorrow and sadness remains Curtains have dropped on our fallen world And the forces of darkness shall rise

Why can't you see what has happened to thee Can you not open your eyes Everything's lost there is no retreat And the valleys echo with pain

No more hope as we raise our hands to the sky  ${\tt No}$  more dreams as the rivers run dry

On the endless sea of madness we sail forever more And the endless tears of sadness towards the distant shores When the flame has died forever we stand one and all With the power of the almighty sword

We fight the battle on the fields tonight To save us from the master of all evil sign And to the battle on forever standing strong We feel the fire power of the night warriors

No more tomorrow Dying of sorrow Over the mountains and up through the trees Traveling across seven seas

On the endless seas of madness we sail forever more And the endless tears of sadness towards the distant shores When the flame has died forever we stand one and all With the power of the almighty sword

We fight the battle on the fields tonight To save us from the master of all evil sign And to the battle on forever standing strong We feel the fire power of the night warriors

On the endless seas of madness we sail forever more And the endless tears of sadness towards the distant shores When the flame has died forever we stand one and all With the power of the almighty sword

We'll fight the battle on the fields tonight To save us from the master of all We fight the battle on the fields tonight To save us from the master of all evil sign

And to the battle on Forever standing strong We feel the fire Power of the night warriors

The power of the night warriors...
