

# Die by the Sword

DragonForce

Outside the battle raging death upon us  
No surrender unchained and free  
Insanity will lead to blind destruction  
Crush the evil, the foul disease

Our final destination reborn in darkness  
Watching and waiting destroying with ease  
The judgement day upon us as dawn is breaking  
Mankind will fall to the spineless deceived

Fly through the storm, power of the steel  
Striking with vengeance, force them to kneel  
Soldiers unite, force of the world  
Fight till the end we will die by the sword

Fight on in foreign fields of mass destruction  
Stand as one, no man left behind  
Our final victory, tonight awaits us  
Slain in darkness behind the lines

Raise the dead, ride beside of me  
Fallen heroes, of a thousand moons  
Blaze ahead the price that they now pay  
On the march to their doom

Fly through the storm, power of the steel  
Striking with vengeance, force them to kneel  
Soldiers unite, force of the world  
Fight till the end we will die by the sword

Fight till the end we will die by the sword

Light the fires of freedom, on the shores of endless seas  
Wings of glory guide us, on the path to victory  
Light the fires of freedom, on the shores of endless seas  
Wings of glory guide us, on the path to victory

Outside the battle raging death upon us  
No surrender unchained and free  
Insanity will lead to blind destruction  
Crush the evil, the foul disease

Fly through the storm, power of the steel  
Striking with vengeance, force them to kneel  
Soldiers unite, force of the world  
Fight till the end we will die by the sword
