

## Evening Star

DragonForce

We will sail on forever on, to the land of the evening  
star...

Into the endless we ride  
Unveil the darkness behind  
Abandoned glory hidden, castaway we ride

Now will the sky surrender  
Forever through the nether  
A silent whisper echoes through my restless heart  
tonight

I will see the glory rise  
We'll be one tonight  
Don't you shut your eyes in silence  
Tonight gather near, come and live your fear

In a land of desire your heart filled with fire  
You live for the right to be free  
We will sail on, forever on to the land of the evening  
star  
In a land of desire your heart filled with fire  
The land of the evening star

Now and forever after  
Asylums filled with laughter  
Suspicion haunts my dreams  
An echo through my mind

This starlit gaze reminds me  
Are you so blind you can't see?  
The winds of change my friend  
Will blow for you in the dead of night

I will see glory rise  
We'll be one tonight  
Don't you shut your eyes in silence  
Tonight gather near, come and live your fear

In a land of desire your heart filled with fire  
You live for the right to be free  
We will sail on, forever on to the land of the evening  
star  
In a land of desire your heart filled with fire  
The land of the evening star
