

# Heart of the Storm

DragonForce

Silently marching, our quest for revenge  
Lost in the forgotten tragedy  
Scars of the past still alive in our veins  
Onwards we fight to our destiny

Trample their forces we now overrun  
Sign of the power inside of us  
Cities in ruins and lives are destroyed  
Stand at the edge of the universe

Suffering fills the open sky  
Battering down the pain inside  
Memories hide the moonlight sky  
Till the end of our days

Conquering lands and fallen heroes  
Sanity torn we ride on fearless  
Victory sounds a thousand miles away

Into this world in wonder from a starlight sky  
For a lifetime of freedom, and the legend is born  
Once more unbroken, the price we will pay  
On this march into fire, the heart of the storm

Endless destruction consuming our land  
Legions of darkness destroy mankind  
Storming the wasteland we now overcome  
Vanquishing evil, insane we find

Rise of the slain, breaking the chains  
Fight through the whirlwind of doom  
Live for the day, conquer the pain  
Under the light of the moon

Into this world in wonder from a starlight sky  
For a lifetime of freedom, and the legend is born  
Once more unbroken, the price we will pay  
On this march into fire, the heart of the storm

Outside the endless rain  
Crushed by the burning pain  
This life goes on forever after  
Across the universe, on through the twilight sky  
And still we feel the fire go on and on

Into this world in wonder from a starlight sky  
For a lifetime of freedom, and the legend is born  
Once more unbroken, the price we will pay  
On this march into fire, the heart of the storm
