

# Valley of the Damned

DragonForce

On a cold dark winter night, hidden by the stormy light  
A battle rages for the right, for what will become  
In the valley of the damned, a warrior with sword in hand  
Travels fast across the land, for freedom he rides

And the sign from the master on high  
He screams aloud and across hear the cry  
For the kingdom of fire and ice  
And the power to be alive

Be strong ride on, carry on through the war  
Come along carry on, living for ever more

On the wings of death, by the hands of doom  
By the darkest light, from the darkest moon  
Crossing silent seas, over mountains high  
For we stand as one tonight

On the black wind forever we ride on together  
Destroying your evil with freedom our guide  
When the master will call us  
He'll stand high before us  
Our hearts filled with splendour  
Our swords will shine over the light

In the valley of the damned  
Days breaks with golden strand  
Over pastures green it glows  
To where night returns

In the shadows faces appear  
Warriors wearing full metal gear  
Join together one and all before the glorious light  
Rise up, gather round, come and hear what is said  
Use your senses open your mind don't you ever forget

On the wings of life, by the hands of hope  
By the brightest light from the brightest sun  
Crossing silent seas over mountains high  
To the valley of the damned!

On the black wind forever we ride on together...

On the black wind forever we ride on together...
