

# The Other One

Dragonsfire

Silent voices, in the air  
Crawling shadows, everywhere  
Time stands still  
As the river flows through these worlds

Tragic ending, save your child  
From the sleep, of endless night  
God of the sun, are you watching?  
The one you created is suffering

Reach for the other one  
Die to live again

High above, shining star, travel on and on  
Strange mind, in the dark, fear the other one

A manmade machine, virtual life was grown,  
In a sterile world of fears  
No one has seen and nobody has known,  
That's going on for years  
Alone in the dark is this consciousness  
And a blinded child so young  
An artificial existence was made  
For the secret of immortal life

Reach for the other one

High above, shining star, travel on and on  
Strange mind, in the dark, fear the other one

Many people have suffered for  
The healing of a few  
The innocent child, that was trapped in this mind  
As the evil project grew  
The prisoner of this brotherhood  
Was detained inside the war  
Encountered the gods of the ancient world  
To free them all

Reach for the other one

High above, shining star, travel on and on  
Strange mind, in the dark, fear the other one

Reach for the other one  
Reach for the other one...
